

IGW METAL WORK STEEL FABRICATION WORKSHOP

At IGW, we seek only those jobs that we can manage effectively. Our team specializes in control room furniture, brackets and vehicle conversions.

About IGW METAL

We started operations in 2015 under the management of seasoned and dedicated professionals with considerable experience in handling a wide range of steel fabrication works.

We specialize in turnkey design, fabrication and installation for industrial, commercial and residential applications. IGW offers creative design concepts to suit client requirements, achieving the highest quality standard within budget and time constraints.

Our design strength lies on a balanced mixture of aesthetic functionality, quality materials and superb finishes.

Our solutions provide clients with versatility of designs, along with the functional elements required – merged in perfect harmony.

Our team goes the extra mile to ensure perfect execution, be it a project on "design and build" basis or with design specifications from designers and clients. From receipt of confirmed order, we closely monitor the successful and timely completion of each project.

Our Commitment

To understand and offer our clients design solutions – from concept design, through to the production process.

To meet client's schedule requirement in a timely manner, whilst applying the highest standards of creativeness, uniqueness and design excellence.

A steadfast commitment in working to a high standard of professionalism with utmost efforts exerted in facilitating success of any task requirement for steel fabrication.

Pre-construction service

Our early involvement in your project will make your job easier, lower your risk.

Schedule driven

Quality and price mean little to you and your project if your steel isn't delivered on time.

Our Tools

We use state of the art machinery.

Quality assurance

Once you start working with us, you should feel no worry about quality of our service.

Our Capabilities:
